APPENDIX-3D-I & II

(Refer section 3.2.2.5)

FORMAT OF THE FINAL SAFETY ANALYSIS REPORT FOR IARPF (This format can also be used for PARF with beam energy <10 MeV)

[FSAR should be submitted to AERB in this format, duly signed by Head of the organisation (employer)]

Α.	ORGANISATION AND ADMINISTRA	ATI(DN:	
(i)	Name and Address of Institution	:		
(ii)	Telephone No.	:		
(iii)	Fax No.	:		
(iv)	Purpose of the Plant (Industrial Application)	:		
(v)	Design Approval of the Device obtained from AERB			
	Model Technical Specification		Maximum energyMaximum current	
	Particles Accelerated Ref. No. Date of issue Valid up to	: -	Taxinidiii current	
(vi)	Site, Layout and Construction Approval of the facility obtained from AERB			
	Ref. No. Date of issue Valid up to	: :		
В.	SAFETY PERSONNEL			
(i)	Head of Institution	:		
(ii)	Facility-in-charge	:		
(iii)	Radiological Safety Officer AERB Approval ref. Date of issue Valid up to	: : :		

DETAILS OF DOCUMENTS TO BE SUBMITTED

Required documents

Technical description of accelerator design and working procedure with drawings

Precommissioning test reports with results

Shielding design and of installation survey (along with drawings and layout)

Electrical circuit diagram and other interlocks of the accelerating device (inbuilt safety features)

Electrical circuit diagram and other interlocks of the accelerator vault

Provisions and procedures for particle beam energy and beam current calibration and periodic checks

Quality assurance manual (operation)

Arrangements for personal and environmental monitoring system

Periodic surveys of radioactive contamination if applicable

Radiation safety manual

Availability of local safety committee and their safety evaluation report

Details deviations from approved beam line components, accelerator vessel, layout, etc.

Decommissioning procedures of the accelerator facility (if applicable)

We certify that all the information provided by us is true and correct to the best of our knowledge and belief.
