

Unusual Incident Reporting Functionality in eLORA System

All radiation facilities in the country are required to intimate occurrence of any unusual incident involving radiation source, within 24 hours of occurrence, to AERB. *This is the mandatory requirement as per the Licence issued by AERB.* To enable intimation of occurrence of unusual incident and providing further follow-up action of it to AERB, “**Incident Reporting**” functionality has been provided in eLORA system.

The “**Incident Reporting**” functionality in eLORA system has 3 e-forms:

- 1. Incident Intimation Report:** Use this e-form to intimate occurrence of incident.
- 2. Incident Update Report:** Use this e-form to update on the current status of incident.
- 3. Incident Investigation Report:** Use this e-form, after complete closure of incident, to submit final investigation report of incident.
