

Atomic Energy Regulatory Board (AERB) co-sponsored a one day theme meeting on 'Coupled neutronics Thermal Hydraulics: Current status and future directions' at Bhabha Atomic Research Centre (BARC) training school hostel on July 23, 2018.

Atomic Energy Regulatory Board (AERB) co-sponsored a one day theme meeting on 'Coupled neutronics Thermal Hydraulics: Current status and future directions' at Bhabha Atomic Research Centre (BARC) training school hostel on July 23, 2018. The meeting was aimed to bring experts together from units of Department of Atomic Energy (DAE) to discuss on the current status of development and decide future actions. Dr. Anil Kakodkar, Dr. R. K. Sinha and Shri S. A. Bhardwaj, Chairman AERB addressed the gathering during the inaugural session. Several presentations by DAE units were made which brought out the status of development. AERB officials also presented developments at AERB with regard to thermal and fast reactors. AERB proposed idea of floating a DAE benchmark towards the validation of coupled codes to establish the credibility of coupled codes for licensing analysis. Meeting deliberations brought out the need of synergy among the teams of DAE working in the field. The meeting was concluded with a panel discussion, chaired by Shri S. A. Bhardwaj, Chairman, AERB.
